

The Schwartz Center's New Healing Healthcare Initiative

The healthcare industry is facing a crisis and healthcare leaders are being met with unprecedented challenges. With more than two decades of experience supporting the mental health and well-being of the healthcare workforce, we are proud to share the Schwartz Center's [Healing Healthcare Initiative \(HHI\)](#).

HHI provides leaders of healthcare organizations with guidance and support to ensure the care they offer is **relationship-based, compassionate, safe and effective**. It will give healthcare leaders the cohesive framework and practical resources they need to build a culture of resilience and inclusion at their organizations. It will empower them to recognize, remedy and prevent psychological distress and stress-related injuries among their staff, and it offers leaders the support they need themselves.
